- The Antipodes Global Fund – UCITS (I Class) outperformed the benchmark over the month and remains ahead over 12 months.

Commentary*

The combination of higher government bond yields and an increase in geopolitical tensions in the Middle East resulted in a risk off move in October. Global equities were negative for the month in USD/AUD terms, however were higher in NZD due to exchange rate impacts (-3.0%). Utilities, information technology and consumer staples outperformed whilst consumer discretionary, industrials and energy underperformed. US equities outperformed (-2.3%) with macroeconomic data highlighting resilience within the economy despite a higher-for-longer rate environment. Further, US treasury bonds fell due to fears of a forecast increase in treasury issuance. European equities underperformed as macroeconomic data disappointed (-3.7%) and central banks reinforced a higher-for-longer scenario.

Asian equities underperformed (-4.1%). Chinese equities were lower (-3.8%) despite positive economic data and more fiscal support. Continued property sector overhang in addition to the tighter US restrictions on firms exporting AI chips to China weighed on investor sentiment. Japanese equities underperformed globally and regionally (-4.5%) as the Bank of Japan tightened monetary policy in line with increasing inflationary data.

Elsewhere, Brent Crude (-8.3% in USD) was volatile but ended lower, Gold (+7.3%) was higher benefiting from a flight to safety, whilst the US Dollar (+0.5%) saw a marginal appreciation.
